

Your Direct Line to Efficient and Economical

Medical Device & Diagnostics Studies

Exact experience. Reliable resources. Greater global reach.

Keeping up with the quick advancement of today's medical device and diagnostics technologies requires specialized knowledge and studies designed to achieve shorter lead times at reduced costs. At DZS, we recognize and resolve these challenges every day.

Together, with the expertise of our scientific leadership team, we are your direct line to efficient and economical medical device and diagnostics studies. Our team provides customized clinical operations support for your trial and the unique patient populations you serve. Using our global expertise and flexible approach, we focus on increasing your study's efficiency, compressing timelines, and supporting your needs across the U.S., Europe, and Asia.

Exact Experience

Get the job done right with a team of local and global experts with decades of device and diagnostics experience.

~40% of DZS studies conducted are device and diagnostics studies, with majority being Class II and III

Cardiovascular

Nephrology

Oncology

Pain

Rare and Orphan Diseases

Respiratory

Reliable Resources

Bring your device and diagnostics technologies to market with experts who:

- Understand your clinical and regulatory strategy
- Develop and manage your study design
- Oversee your project management and monitoring
- Monitor your data management and statistical analysis
- Guide you through the regulatory submittal and compliance maze

Clinical Development Services:

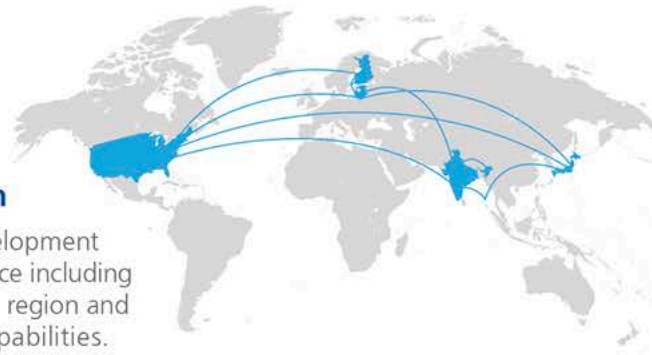

- Clinical study design
- Key opinion leaders and advisory board development
- Clinical evaluation reports (CERs)
- Meta-analyses
- Safety surveillance and observational programs

Medical Device & Diagnostics Expertise:

- Class I-III
- Home use
- ICU-based
- Wound care

Greater Global Reach

Support your product development with our worldwide presence including U.S., EU, MENA, and APAC region and a wide range of global capabilities.

Recent Experience

- **Large, multinational, multiphased IVD projects (>30,000 samples)**

Developed the world's first fully automated and integrated testing platform for both blood grouping and donor disease screening

- **Multiple projects on unique IVD products across U.S. and Asia (>12,000 subjects/samples)**

Developed first fully automated urine chemistry analyzer/particle imaging device

- **Oncology diagnostic tools**

Novel photo-diagnostic tools utilized to screen and treat cancers

- **>15 additional medical device projects in the last three years in respiratory, ICU devices, and ophthalmology**

Many submitted to regulatory bodies globally

Introduction to our DZS Leadership Team

Greg Ambra, M.S. - CEO

With over 20 years experience in clinical research and having held strategic leadership positions in industry-leading sponsor and CRO companies, DZS' CEO continues to foster a culture of excellence, sense of urgency and sincere desire to mentor and grow future leaders in the industry. Leading the organization through numerous multinational drug and device development programs, many have resulted in successful regulatory approvals and significant commercial success. Achieving consistent growth and expansion throughout his tenure, he has overseen significant top-line revenue growth and broadened the number of clients served.

Norifumi Ninokata, MTEch -President

With vast international business and clinical research experience, DZS' President brings in-depth strategic planning, personnel management and subsidiary oversight to our seasoned leadership team and in bridging our global organization. Leading multiple M&A activities in Japan, his contributions have led to the expansion of the CRO business for the WDB Group as a whole most notably perhaps in the US and EU. Both tireless and resolute, his leadership is marked by an appreciation for innovation, an ambition towards constant improvement, and a demonstrated vision in adding value to both members and clients alike.
