# The DZS Difference

Maximizing Efficiency Through Superior Service and Global Access

## Clinical Development Strategy

Access key advisers with experience in strategic planning for your drug, device or diagnostic, including project and end-point feasibility and protocol design. Our advisers also have the ability to provide regulatory strategy and representation.

## Clinical Operations

Collaborate with a global network of in-house resources and a team of clinical project management and clinical monitoring experts to select sites, determine feasibility, and manage and monitor your project from start-up to close-out.

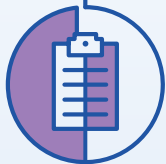

## Data Analytics

Put data integrity at the forefront of your study with our clinical data management, medical coding, scientific writing, and biostatistics support and statistical programming teams.

## Pharmacovigilance & Risk Management

Improve the pre- or post-market surveillance of your therapeutics with a systematic approach to monitoring and risk management, including end-to-end case processing and reporting.

## Medical Affairs

Get support for your post-marketing activities and market access challenges with our experienced team. From real-world evidence trials and statistical models to health economics and market access strategies to IIT program development, we are here to help.

## Strategic Outsourcing Solutions

Ensure just the right fit for your organization and quality and timely delivery of your desired outcomes with our global short- and long-term contracts and a variety of staffing models.
